Erik Weisman, Ph.D.

- 18 years with MFS
- 22 years in industry

Institutional Portfolio Managers**

Kate Mead, CFA

- 22 years with MFS
- 25 years in industry

Owen David Murfin, CFA

- 2 years with MFS
- 23 years in industry

Current portfolio manager Nevin Chitkara will relinquish his portfolio management responsibilities on the portfolio, effective December 31, 2020.

Effective June 30, 2021, Robert Persons will no longer be a portfolio manager of the portfolio.

Fund benchmark

60% MSCI World Index (net div) / 40% Bloomberg Barclays Global Aggregate Index

A conservative global balanced fund

The fund's investment objective is to seek total return, measured in US dollars.

Key Points:

- Conservative approach to investing in global larger cap companies and global bonds
- Historically the fund has allocated assets at approximately 60% stocks, 40% bonds

Portfolio structure (%)

Stocks (60.5)
Bonds (26.6)
Other (12.1)
Cash & Cash Equivalents (0.8)

Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

Top 5 equity holdings

ROCHE HOLDING AG
TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD
SCHNEIDER ELECTRIC SE
KDDI CORP
HONEYWELL INTERNATIONAL INC (EQ)

11.7% of equity assets

Credit quality[†]

(% of fixed income)

U.S. Government	12.0
Federal Agencies	18.6
AAA	10.3
AA	21.2
A	25.0
BBB	52.1
BB	0.4
B	0.1
CCC and Below	0.1
Other Not Rated*	-39.9

Avg. credit quality: A+

Growth of a \$10,000 investment over 10 years and 1 year at NAV (%) as of 30-Sep-20

■ Class A2USD Shares

— 60% MSCI World Index (net div) / 40% Bloomberg Barclays Global Aggregate Index

Fund returns assume the reinvestment of dividends and capital gain distributions but do not include a sales charge. Results would have been less favorable if the sales charge were included. This example is for illustrative purposes only and is not intended to represent the future performance of any MFS product. **Past performance is not a reliable indicator for future results.**

Calendar year total returns (%), not including sales charge A2USD[^]

USD			3.77	9.25	6.60	8.07	6.73						

Past performance is not a reliable indicator for future results. All financial investments involve an element of risk. The value of investments may rise and fall so you may get back less than originally invested.

Investors should consider the risks, including lower returns, related to currency movements between their investing currency and the portfolio's base currency, if different.

Other share classes are available for which performance and expenses will differ.

Returns would have been lower had sales charges, of up to 6% of the net asset value (NAV), or any commissions, fees or other charges that your financial intermediary may charge been reflected.

Performance results reflect ongoing charges and any applicable expense subsidies and waivers in effect during the periods shown. All historic results assume the reinvestment of dividends and capital gains.

The source for all fund data is MFS. Source for benchmark performance: SPAR, FactSet Research Systems Inc.

Fund Inception Date: 26 September 2005

[^] Results represent the percent change in NAV.

^{^^} Periods less than one year are actual not annualized.

[†] Ongoing charges are expressed at an annual rate as a percentage of net assets and are based on expenses for the semi-annual period ending July 31 or annual period ending January 31. For a Class with less than the full period of data available, or where an adjustment is necessary to reflect current charges, the ongoing charges figure is an estimate. Ongoing charges may vary from year to year. Please see the KIID of the relevant Class for the most recent expense information.

¹ The MFS Meridian Funds offer several share classes each with different expenses. Performance reflects the performance of a relevant older class with the same currency until the actual start of class performance record of the class detailed. Performance for periods prior to that date may have been higher or lower had the actual share class fees and expenses been reflected.

² Hedged share classes aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class and the unhedged base currency class of the fund. From time to time shareholder transactions in the share class could result in a gain or a loss, which could be significant, in the share class value that is attributable to the adviser's hedging activities rather than to its investment management activities. Other share classes will not share in these gains or losses. Class I shares are only available to certain qualifying institutional investors.

Class W shares are available to discretionary portfolio management or independent advisory accounts, clients of financial intermediaries otherwise prohibited from receiving compensation from the Fund, and to employees of MFS and its affiliates.

[‡] The Average Credit Quality (ACQR) is a market weighted average (using a linear scale) of securities included in the rating categories. For all securities other than those specifically described below, ratings are assigned to underlying securities utilizing ratings from Moody's, Fitch, and Standard & Poor's rating agencies and applying the following hierarchy: If all three agencies provide a rating, the middle rating (after dropping the highest and lowest ratings) is assigned; if two of the three agencies rate a security, the lower of the two is assigned. If none of the 3 Rating Agencies above assign a rating, but the security is rated by DBRS Morningstar, then the DBRS Morningstar rating is assigned. Ratings are shown in the S&P and Fitch scale (e.g., AAA). All ratings are subject to change. U.S. Government includes securities issued by the U.S. Department of the Treasury. Federal Agencies includes rated and unrated U.S. Agency fixed-income securities, U.S. Agency MBS, and CMOs of U.S. Agency MBS.

Other Not Rated includes fixed income securities which have not been rated by any rating agency. The portfolio itself has not been rated.

TRAILING 3-YEAR RISK MEASURES VS. BENCHMARK (A2USD)

Beta	0.93
Standard Deviation	10.21 vs. 10.82

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. It is most reliable as a risk measure when the return fluctuations of the portfolio are highly correlated with the return fluctuations of the index chosen to represent the market.

Standard Deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

RISK AND REWARD PROFILE CLASS (A2USD)

◀ Lower Risk (typically lower rewards)			Higher Risk ▶ (typically higher rewards)			
1	2	3	4	5	6	7

The rating is based on past volatility of returns and may be different in the future or for other classes of the fund.

See the fund's offering documents for more details, including information on fund risks and expenses.

The offering documents (sales prospectus and Key Investor Information Documents (KIIDs)), articles of incorporation and financial reports are available to investors at no cost in paper form or electronically at meridian.mfs.com, at the offices of the paying agent or representative in each jurisdiction or from your financial intermediary. KIIDs are available in the following languages; Danish, Dutch, English, French, German, Italian, Norwegian, Portuguese, Spanish, and Swedish. The sales prospectus and other documents are available in English. For additional information, call 416.506.8418 in Toronto or 352.464.010.600 in Luxembourg or your local paying agent or representative. **Ireland:** Bridge Consulting Limited, 33 Sir John Rogerson's Quay, Dublin 2, Ireland. Tel: +353 (0)1-631-6444 **United Kingdom:** Facilities Agent: MFS International (UK) Ltd., One Carter Lane, London, EC4V 5ER UK. Tel: 44.(0)20.7429.7200.

MFS Meridian Funds is an investment company with a variable capital established under Luxembourg law. MFS Investment Management Company (Lux) S.à.r.l. is the management company of the Funds, having its registered office at 4, Rue Albert Borschette, L-1246, Luxembourg, Grand Duchy of Luxembourg (Company No. B.76.467). The Management Company and the Funds have been duly authorised by the CSSF (Commission de Surveillance du Secteur Financier) in Luxembourg.

MFS Meridian Funds are recognised under Section 264 of the Financial Services and Markets Act of 2000 (reference number 435996) and U.K. investors should note that holdings of shares in the funds will not be covered by the provisions of the Financial Services Compensation Scheme, or by any similar scheme in Luxembourg.

Important risk considerations

The fund may not achieve its objective and/or you could lose money on your investment in the fund. ■ **Stock:** Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, and other conditions. ■ **Bond:** Investments in debt instruments may decline in value as the result of, or perception of, declines in the credit quality of the issuer, borrower, counterparty, or other entity responsible for payment, underlying collateral, or changes in economic, political, issuer-specific, or other conditions. Certain types of debt instruments can be more sensitive to these factors and therefore more volatile. In addition, debt instruments entail interest rate risk (as interest rates rise, prices usually fall). Therefore, the portfolio's value may decline during rising rates. Portfolios that consist of debt instruments with longer durations are generally more sensitive to a rise in interest rates than those with shorter durations. At times, and particularly during periods of market turmoil, all or a large portion of segments of the market may not have an active trading market. As a result, it may be difficult to value these investments and it may not be possible to sell a particular investment or type of investment at any particular time or at an acceptable price. The price of an instrument trading at a negative interest rate responds to interest rate changes like other debt instruments; however, an instrument purchased at a negative interest rate is expected to produce a negative return if held to maturity. ■ **Derivatives:** Investments in derivatives can be used to take both long and short positions, be highly volatile, involve leverage (which can magnify losses), and involve risks in addition to the risks of the underlying indicator(s) on which the derivative is based, such as counterparty and liquidity risk. ■ **Value:** The portfolio's investments can continue to be undervalued for long periods of time, not realize their expected value, and be more volatile than the stock market in general. ■ Please see the prospectus for further information on these and other risk considerations.

Benchmark and vendor disclosures

The 60% MSCI World Index (net div) / 40% Bloomberg Barclays Global Aggregate Index (USD) is composed of the following two indices: MSCI World Index - a market capitalization-weighted index that is designed to measure equity market performance in the global developed markets. Bloomberg Barclays Global Aggregate Index provides a broad-based measure of the global investment-grade fixed income markets. The three major components of this index are the U.S. Aggregate, the Pan-European Aggregate, and the Asian-Pacific Aggregate Indices. The index also includes Eurodollar and Euro-Yen corporate bonds, Canadian government, agency and corporate securities, and USD investment grade 144A securities.

It is not possible to invest directly in an index.
